

Carving mallets unlike normal mallets are round in shape. Investigate why this might be?

The design of the mallet's handle is one of the most important parts of this project. Why might this be?

What will effect the size and shape of this handle?

Designing a wooden mallet for a wood carver

What will a carver's mallet be used for? What type of timber or finish would be most suitable for its use?

What procedure can be used to process the sections below:
