

How might we decide on length for our foot roller?

Think about how it will be used?

What will the diameter of the foot roller depend on?

Select a suitable diameter for the roller:

Help in the design of a simple 'Foot Massager' that can be made using the turning skills we have acquired

What procedure might we use to turn the shapes on the roller?

What problem might incorporating the O-Rings solve? Might this problem be solved without the use of O-Rings?
